

Drive Smart Pro

Apply to ICBC's Drive Smart Pro and be part of the future of road safety and telematics.

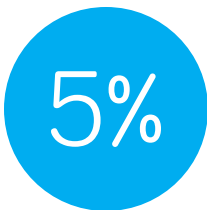

What is Drive Smart Pro?

Drive Smart Pro is our commercial telematics program that helps inform future road safety and telematics initiatives. With your permission, it uses your existing telematics system to share driving data with ICBC — like speed, acceleration, harsh braking and cornering. This will help us better understand driving habits and find ways to improve road safety.

Are you eligible?

You must have a Fleetplan policy and maintain a telematics service provider for the duration of the program.

Why join?

If you're selected and you grant us access to your telematics data for six months starting summer 2026, you can save on your insurance!

What's good to know?

Your shared driving data will not be used beyond this program, to determine your insurance premium or to add penalties or surcharges. Your information is kept private and confidential. You can withdraw from the program at any time.
